

HOW YOU CAN HELP!

VOLUNTEER

Volunteers are critical to the success of Healing Reins. Our volunteers serve in many ways, but share a common goal. From the barn to the office, a rewarding experience is here for you!

DONATE

Our Adaptive Horsemanship program is funded by donors to provide low-cost services to our participants. Grants, corporate sponsors, and individual donations make this possible for our organization. Every dollar stays local to make a difference in our community and to those we serve!

OUR PROGRAMS

Equine-Assisted Learning

Equine-assisted Learning is an experience-based equine learning program designed to promote education, life skills, personal development and critical thinking. These activities may be private or in a group setting at the farm or at an off-campus location, and is tailored to the group's specific needs.

Equine Mobile Experience

The Healing Reins Mobile Experience provides an equine educational experience complete with miniature horses. The trailer travels around the community to deliver our "Reading with Rocky" literacy program, visit groups that are unable to visit us and attend community gatherings and public events.

ADAPTIVE HORSEMANSHIP

Mounted and Un-mounted Lessons

Our PATH Intl. certified instructors teach riding lessons and/or un-mounted horsemanship skills specifically designed to serve participants with diverse needs.

Outcomes of these services can include confidence, leadership skills, fine and gross motor skills, balance, strength, coordination and other life skills. An assessment by staff and medical release is required for participation.
